II. For the purpose of these rules—

(*a*) Irrigation is said to be 'regular' when water is used for a crop under and in accordance with the terms of a permit issued by such authority as may be notified in that behalf in the District Gazette by the Collector of the district, if the source from which water is taken is in the charge of the Revenue Department, and by the Superintending Engineer if the source is in the charge of the Public Works Department. All other irrigation is 'irregular.'

(*b*) The following irrigation sources shall be placed in 'Group I' namely :—

(i) sources which the Settlement Party has placed in classes I and II for the purpose of fixing the land revenue assessment on registered wet lands;

(ii) the Tirumanimutharuadhi, the Poothayar the Yedappadiyar and the Vettiyar ; and

(iii) all tanks registered either in the revenue accounts or in the printed settlement registers as affording six months supply.

All other sources of irrigation shall be placed in 'Group II.'

(*c*) (i) A 'wet crop' includes paddy and any other crop, which is systematically irrigated for not more than six months.

(ii) A 'dufasal crop' includes sugarcane, betel, plantain, turmeric, elephant yam, areca, limes, oranges, pomegranates and any other crop, which is systematically irrigated for more than six months.

(iii) A 'dry crop' means a crop which is neither a wet crop nor a dufasal crop :

Provided that 'Mundia' paddy shall be regarded as a dry crop ;

Provided further that a cocoanut garden or any other plantation of trees shall be regarded as dufasal crop, if it is systematically irrigated for more than six months in the fasli, and as a wet crop, if it is so irrigated for not more than six months.

Explanation.—The Collectors of the Salem and Trichinopoly districts shall, from time to time, publish in their respective District Gazettes lists of the crops which are to be regarded as wet or dufasal crops within the meaning of this clause, in addition to the wet or dufasal crops specified herein.

(*d*) A 'second crop' is a crop grown on land on which a first irrigated wet or dry crop has already been grown in the same fasli ; and

(*e*) A 'third crop' is a crop grown on land on which two irrigated wet or dry crops or an irrigated dufasal crop has already been grown in the same fasli.

III When water from any Government source, other than the Cauvery, is supplied or used for the regular irrigation of crops in the area to which these rules apply, water-cess shall be levied at the following rates and be collected according to the kuthcudi of the district concerned :

Provided that when the water cannot be used for irrigation, without raising it by baling or by means of a mechanical contrivance, a deduction of one-fourth of the said rates shall be made.

IV. For irregular irrigation with water from any Government source, other than the Cauvery, water-cess shall be levied in accordance with the rules contained in Revenue Department Notification No. 139, dated the 8th May 1933, published at pages 778–780 of Part I of the *Fort St. George Gazette*, dated the 23rd May 1933, as altered or amended from time to time.

V. Notwithstanding anything contained in the foregoing rules, the Government reserve the right, with or without reasons given, to discontinue, either temporarily or permanently, the supply of water to any land, to alter the source of supply of water to any land, and to modify the method of charging for water and the rates at their discretion.

ANNEXURE.

Letter from M.R.Ry. J. BALAJI RAO Avargal, B.A., Special Assistant Settlement Officer in charge, Revenue Settlement Party No. II, Salem, to the Joint Secretary, Board of Revenue, Madras, (through the Collectors of Salem and Trichinopoly), No. C. 273/36 Confdl., dated 14th February 1936

[Settlement—Re-settlement—Salem district Southern taluks—Trichinopoly district—Portion of Musiri taluk —Water-rate revision Proposals submitted.]

With reference to paragraph 13 of G.O. No. 238, Revenue, dated 1st February 1935, I beg to submit proposals for the revision of the existing scales of water-rate in the seven southern taluks of the Salem district named in the margin *, and the twenty-six villages of the Musiri taluk of the Trichinopoly district covered by the Scheme Report.

* 1 Salem.
2 Attur
3 Namakkal.
4 Rasipur
5 Tiruchengodu.
6 Omalur.
7 Harur.

2. *Scope of the report.*—Water-rates are imposed in the tract under report under the two heads given below :—

(I) *Water rate on dry lands irrigated under* doruvu wells.

(II) Water-rate on dry lands irrigated under sources other than doruvu wells.

(I) *Water-rate under* doruvu wells.

3. At present, the levy of water-rate on dry lands irrigated from doruvu wells is governed by the rules laid down in Board's Standing Order No. I, paragraph I (8). Water-rate is charged at one-fourth or one-eighth of the

difference between the dry and wet rates pertaining to the class and sort of soil under which each field is classed according as water is raised by single or double lift irrespective of the nature or number of crops grown. The calculation of charges under this method is cumbersome and takes much of the karnams' and checking officers' time. The method is not intelligible to ordinary ryots. A simpler and more satisfactory method of calculating water-cess on lands irrigated by dacuvu wells has now been laid down in paragraph 22 of the resettlement notification for the tract under report published as a supplement to the District Gazette for February 1936, according to which lands forming the ayacut of dacuvu wells registered as dry in the accounts will be charged water rate at one-fourth of the rate usually charged for water supplied to a wet crop if water is raised by single lift and at one-eighth of the same rate if water is raised by double lift irrespective of the nature of the crops grown. No charge will be made for the cultivation of a second crop

(ff) Water-rate under sources other than dacuvu wells.

4 (i) The present maximum charge for water is Rs. 4 per acre and this rate was fixed so long ago as 1813 (about the time of the original settlement of the tract) on the basis of the rate for a wet crop then in force in the Kistna and the Godavari deltas. Though, in the latter areas, the rate was raised to Rs. 5 and Rs. 8 or Rs. 6-4-0 in 1903 and 1931 respectively for the dry lands irrigated, it remains unaltered in the tract under report up to the present day.

(ii) Existing grouping of irrigation sources.—The explanatory note [now explanation (1) to Appendix I to section A to Board's Standing Order No. 4] lays down that for purposes of charging fixed rate of water-cess, irrigation sources should be divided into two classes, that sources placed in the first or second group (class) by the Settlement Department should be treated as first class and that those placed by the Settlement Department in groups lower than the second should be treated as second class. This rule was not feasible of adoption in the district as the classification of irrigation sources by the Settlement Department which had been made over sixty years ago, i.e., in about 1873 was not done on any standard principles of settlement nor solely with reference to their capacity. Thus we find tanks registered as having a capacity of one month, three months or six months all shown under class III. If the classification had been made on strict settlement principles tanks having six months capacity should have been placed in class II. The grouping of sources in force in the tract in question for water-rate purposes is as shown below :—

(1) Irrigation of dry lands from sources placed in the I and II class by the Settlement Department is charged first-class water-rate.

(2) The same rate is charged for irrigation from the Tirunanimuthuraadi, Yedappadiyar, Ponnayar and Vaniyar as well as from all tanks registered as affording six months' supply.

(3) Irrigation under all the other sources is charged second class rates.

(iii) The existing scales of rates and the case for their revision.—For the irrigation of dry lands from first group sources the rates now in force are: rupees four per acre for wet crops and rupees two and rupees three for occasionally and systematically irrigated dry crops respectively. [Appendix I-A to Board's Standing Order No. 4 (2).]

Three fourths of these rates are charged for irrigation from the second group sources. The two and four rupees rates were fixed sixty years ago. A distinction between occasional and systematic irrigation of dry crops was made in 1890. Dry crops systematically irrigated were charged the same rate as wet crops. Six years later, i.e., in 1896, it was considered that the systematically irrigated dry crops were not unlike the same crops as paddy and such other crops were therefore ordered to be charged an intermediate rate between the dry and wet rates, i.e., at Rs. 3 an acre. This division of crops into systematically and occasionally irrigated was extended to the second crop in 1898. The question of distinction between systematic and occasional irrigation formed the subject of much adverse criticism and Government while agreeing with the Board that the system was open to grave disadvantages, ordered the classification of crops into wet and dry separately for each district or taluk as might be found necessary. At the same time Government recognized the need for enhancing rates of watercess throughout the Presidency on the ground of increase in the prices of agricultural produce and invited the views of the Board as to why the rates for a first wet crop and for a first dry crop should not be raised to Rs. 5 and Rs. 2-8-0 respectively and why the intermediate rate of Rs. 3 should not be abolished. The reasons adduced in support of the proposal were :—

(1) that the price of paddy had risen and

(2) that in the matter of communications, considerable progress had been made owing to the improvement and extension of roads and railways and that increased facilities had, in consequence, been afforded for both internal and external trade,

The investigation then conducted which was in 1905 showed that the percentage of increase in the price of rice between 1873 and 1903 in Salem was the highest in the Presidency being as much as 63 and that in respect of paddy the percentage increase was 41 which was much more than the Presidency average of 31. The case for enhancement is much stronger now than in 1905. Full particulars of improvements in the economic condition of the tract have been given in paragraphs 13 to 29 of the scheme report. The increase in the market price of paddy which is the principal irrigated crop in the district is one of the factors that affects the value of water to the cultivator. The net average summutation prices adopted for paddy and the dry grains during the original settlement, the last resettlement and the current resettlements together with the percentage of increase are given below :—

—	Commutation rate adopted at			Percentage of increase of the present resettlement rates over the figure of	
	Original settlement (1873).	Last Resettlement (1903-04).	Present Resettlement (1932-33)	1873	1903-04.
Paddy ..	100	112½	300	200	174·07
Dry grains.	100	112½	354	254	214·67

Prices of paddy have risen by more than 200 per cent within the last sixty years. The percentage of increase in respect of dry grains has been 254. Corresponding to the increase in the commutation rates the sale and lease values of both wet and dry lands have also increased as detailed in the scheme report. A comparison of the figures relating to the sale value of the land given in the relevant scheme reports gives the following result :—

—	Average value in the years		Increase.	Percentage of increase.
	1871-75.	1929-33.		
	Rs. A. P.	Rs. A. P.	Rs. A. P.	
Dry land.	41 8 0	130 8 0	89 3 0	217
Wet land.	93 0 0	526 14 0	421 14 0	426·26

In view of these facts, there can be no two opinions on the point that the existing rates are low and deserve enhancement.

5. *Proposals for the revision of the existing rates.*—(i) The first question to be considered in this connexion is whether the existing grouping of sources requires any modification. The sources placed under the first group include the Cauvery channels which have been placed in the first class for purposes of fixing the wet assessment. Government have fixed a special scale of water rates for irrigation of dry lands with the water of the Raja channel, the Komarapalayam channel and the Mohanur channel taking off from the Cauvery of any tanks or other sources fed by these channels. (Please see notification No. 98, published on pages 831 and 832 of Part I of the *Fort St. George Gazette*, dated 24th April 1934.) What remains to be considered in this report is whether the existing classification into two groups of sources other than the Cauvery requires modification. For the upland sources in the two Godavaris and the Kistna which were recently resettled revised rates of water-cess were sanctioned. Appendix I B Part II to Board's Standing Order No. 4 which contains these rates, however, recognizes three groups for the uplands in the above districts. No doubt the three group system gives greater elasticity in the matter of levy of water-cess. Its adoption for water rate purposes in the trace dealt with in this report cannot, however, be satisfactory in view of the existence of anomalies in the classification of irrigation sources. In this district, the classification of irrigation sources and the soil classification fixed at the original settlement were closely connected operations and one cannot be altered without disturbing the other. This aspect of the question of the reclassification of sources has been dealt with in paragraphs 34 and 35 of the scheme report of the southern taluks. Government have accordingly ordered that no reclassification of sources is necessary. The present system of two groups of irrigation sources

for the purpose of levying water-cess has been in vogue for over 40 years, and is well understood both by the people and the Revenue officers. There is no need to change this.

(ii) The next question for consideration is by what percentage the existing rates should be enhanced with reference to the rise in prices and whether the increase should be uniform. Under the revised rates of assessment sanctioned for the tract in G.O No. 258, Revenue, dated 1st February 1915, the average incidence of assessment under wet lands commanded by sources placed by the settlement staff in the second class is Rs. 9–8–3 per acre and that under the dry lands is Rs. 1–6–11. The difference of Rs. 8–1–4 (eight rupees in round figures) represents the charge for water for two crops on an acre of dry land. There will be a slight reduction in this figure if the entire extent and assessment of wet lands forming the ayacut of all the sources grouped under the first for water-rate purposes are taken into account. Separate figures are not, however, available for the irrigation of sources placed in classes lower than the second for purposes of fixing the wet assessment and placed in group I for water-rate purposes. The average charge for water for two crops on an acre of land under first-group sources may therefore be taken as Rs. 7–8–0 per acre, i.e., at an amount which is a little less than Rs 8. I beg to propose the rates shown below as the charge for water for the irrigation of an acre of dry land from first-group sources. On the analogy of the ratio adopted between the rates for the first and second group sources, I recommend that three-fourths of the above rates may be adopted for the irrigation of dry lands from the second-group sources. The resultant rates will be—

	Group I.	Group II.
	Rs. a. p.	Rs. a. p.
For a dalsal crop	7 8 0	5 10 0
For a first wet crop paddy ..	8 0 0	6 12 0
For any other first wet crop	2 12 0	2 13 0
For a first dry crop and for a second or third crop, wet or dry	2 8 0	1 14 0

The rates now proposed for the first-group sources are the same as those adopted for the same group of sources in the upland tract of the Kistna and the two Godavaris while those proposed for the second group sources are a little less than those fixed for the second group sources in the latter tract. That the rates now proposed are the same as those proposed to be introduced 30 years ago when the prices of the staple food-grains were comparatively much less will clearly show that the proposed rates are not excessive.

So far as the rates for the first crop are concerned, the proposals involve an enhancement of 25 per cent. Under the second crop, in respect of two rates, namely, Rs 2–8–0 and Rs. 1–14–0, an change is involved, while in respect of two other rates, namely, Rs. 3 and Rs 2–4–0, there is a reduction by 16⅔ per cent. This is due to the introduction of a single rate for all second crop irrigated irrespective of whether the crop is wet or dry and whether it is systematically or occasionally irrigated. The following table shows in one view the existing and the proposed rates :—

6. *Tirukkani on minor inams and lands in proprietary villages.*—The existing practice has been to charge water-rate on minor inams and other lands in proprietary villages according to the scale of fixed water-rates applicable to ryotwari villages in respect of irrigation from Government works. The extent irrigated according to accounts of fasli 1342 is 451·13 acres and the amount realized is Rs. 1,381 12-0. I submit that the existing practice may continue and that the revised rates proposed may be applied for the irrigation of the above classes of lands also.

7. *Financial results.*—The financial effects of the above proposals are given in the statement appended. It has been prepared on the basis of the water-rate revenue derived in fasli 1342.

Note.—(1) Water-cess levied for the irrigation of unassessed lands, poramboke and unassessed lands and penal water-rate levied for irregular irrigation are not included in the figures.

(2) The method employed in calculating the probable enhancement on the ryotwari minor inams and other lands is as shown below :—

The extent of irrigated land was tabulated rate-wise with reference to No. 2 accounts of the village, the corresponding new rate was applied to the tabulated area falling under each rate and then the extent and assessment of all the rates were totalled up. The difference between the existing charge and the proposed charge gives the enhancement resulting from the proposals.

(3) In the case of dumma wells, the probable charge has been calculated at one-fourth of Rs 8 or Rs 2-0-0 per acre (3/4 of the first wet crop rate according as the source of irrigation from which water is drawn is in the first or second group. The water-rate accounts show that irrigation in all these cases is only by single lift.

If the above proposals are approved the anticipated increase in the water rate revenue of the tract under report excluding the Cauvery irrigated area will be Rs 6,104–4–0 or 24·7 per cent over the existing charge.

Statement showing the financial results by the application of the proposed water-rate.

10. At an inquiry into an election petition the Commissioner of the Corporation of Madras may appoint a legal practitioner or other person to attend and take such part therein as the Court may allow.

11. If in the opinion of the Court—

(*a*) the returned candidate, his agent, or any other person with the connivance of such candidate or agent has committed, or abetted the commission of, any election offence falling under section 60 of the Act or under Chapter IX-A of the Indian Penal Code, or

(*b*) the election of the returned candidate has been procured or induced or the result of the election has been materially affected, by any of the following corrupt practices:—

(ii) any payment or promise of payment to any person whomsoever on account of the conveyance of any elector to or from any place for the purpose of recording his vote:

(iii) the hiring, employment, borrowing or using for the purposes of the election of any boat, vehicle or animal usually kept for hiring or hire or for the conveyance of passengers by hire:

Provided that any elector may hire any boat, vehicle or animal or use any boat, vehicle or animal which is his own property to convey himself to or from the place where the vote is recorded:

(iv) the hiring, using, or letting as a committee room or for the purpose of any meeting to which electors are admitted, of any building, room or other place where intoxicating liquor is sold to the public; or

(c) the result of the election has been materially affected by any irregularity in respect of any nomination or the improper acceptance or refusal of any nomination or by the improper reception or refusal of a vote, or by any non-compliance with the provisions of the Act or the rules made thereunder the election of the returned candidate shall be void:

Provided that if the Court is of opinion that any corrupt practice specified in clause (b) of this rule, which does not amount to any form of bribery other than treating as hereinafter explained, has been committed and if the Court is further of opinion that the candidate has satisfied it that—

(a) no corrupt practice was committed at such election by the candidate and that any corrupt practices committed were committed contrary to the orders and without the sanction or connivance of such candidate; and

(b) such candidate took all reasonable means for preventing the commission of corrupt practices at such election; and

(c) the corrupt practices committed were of a trivial, unimportant and limited character; and

(d) in all other respects the election was free from any corrupt practice on the part of such candidate or any of his agents; then the Court may find that the election of such candidate is not void.

Explanation.—For the purpose of this rule "treating" means the incurring in whole or in part by any person of the expense of giving or providing any food, drink, entertainment or provision to any person with the object, directly or indirectly, of inducing him or any other person to vote or refrain from voting or as a reward for having voted or refrained from voting.

13. (1) At the conclusion of the inquiry the Court shall declare whether the election of the returned candidate is void under rule 11.

(2) If it declares the election of the returned candidate void it shall further pass an order either

(a) declaring that any other party to the petition who has under these rules claimed the seat has been duly elected; or

(b) ordering a fresh election.

(3) The order of the Court under sub-rules (1) and (2) shall be final.

(4) A copy of every order under sub-rule (1) or sub-rule (2) shall be communicated to the Commissioner of the Corporation

13 When an election is declared void under sub-rule (1) of rule 12 and a fresh election is ordered under clause (b) of sub rule (2) of rule 12 the seat of the returned candidate shall be deemed to be vacant from the date of the order of the Court and the authority concerned shall forthwith take the necessary steps for holding such fresh election.

THE SRI CHITRA EXHIBITION, 1936

No. 350.—The following preliminary prospectus of the All-India Exhibition to be held at Trivandrum in November 1936 is published for general information.—

All India Exhibition comprising exhibits pertaining to agriculture and fisheries, industries, arts and crafts, education, public health, history and archæology, rural industries, etc., to be held during the celebrations connected with the birthday of His Highness the Maharaja of Travancore —November 1936.

FOREWORD.

It is proposed to hold an All-India Exhibition in Trivandrum in connexion with the celebration of the next birthday of His Highness the Maharaja, which comes off on the 17th November 1936.

The birthday of His Highness the Maharaja is a very important occasion in Travancore when the people vie with one another in celebrating it in a fitting manner and, in Trivandrum, the capital of the State, there will be many important ceremonial and official functions during the Birthday Week. The birthday celebrations in Trivandrum attract several thousands of sight-seers and holiday-makers from all parts of Travancore and also from outside the State. Distinguished guests, aristocrats, business magnates, professional men and others will take part in these functions.

The exhibition will be conducted on a grand scale. Exhibits from all over India, whether manufactured in this country or abroad, will be welcome. This will be a fitting occasion for wide publicity; and the advertising value of the wares exhibited will indeed be great. It is expected that large numbers of exhibits from all parts of India will be received, and a large concourse of people will avail themselves of this opportunity to visit this picturesque part of India at a time when they will have a rare chance of witnessing the many functions associated with the birthday celebrations. Travancore can rightly claim a place among the most advanced States in India. Advantage can also be taken by those who are so inclined, to visit the many celebrated shrines and important places of absorbing interest like Cape Comorin, Jnanadanam, etc.

The exhibition is intended primarily to enable the people to know the nature and extent of the natural resources, actual and potential, of the State, to consider how best they can be utilized and developed, to gauge the comparative position of Travancore in respect of economic activities, and, while advertising and popularizing the existing industries, encourage all active and prospective industrialists, manufacturers, artisans and others to emulate, by comparison and study, their brethren elsewhere so that the pace of economic progress in the State may be further accelerated.

The exhibition will be in the hands of a large and representative Committee composed of leading officials and non-officials and will be conducted on up to date lines with Government co-operation. It is hoped that agriculturists, industrialists, traders and others interested will avail themselves of this opportunity to exhibit and advertise their wares by participating in the exhibition.

GENERAL INFORMATION.

1. The exhibition will be called "The Sri Chitra Exhibition, 1936."

2. Accommodation for exhibits (except machinery to be used for demonstration purposes) will be provided in the stalls. Machinery exhibits will be housed in machinery sheds provided for the purpose within the Exhibition grounds. The provision of accommodation is subject to the payment of rent as will be indicated in the rules. All reasonable facilities will be afforded for demonstration of machinery and methods.

3. The stalls will be of uniform size, each measuring 10' × 10'. Stalls will be available in single or multiple units. Those who desire to have stalls of special dimensions may apply to the convener and arrangements will be made for such special stalls if space and time permit. Special rates on application.

4. A general stall will be opened for exhibiting small articles and rare specimens under the direct supervision of the Exhibition Committee for the convenience of those exhibitors who do not attend in person or send their representatives. A minimum rent, to be paid in advance, will be charged for such exhibits and 10 per cent commission on sale.

5. The stalls will be provided with electric lights.

6. The Committee will make arrangements with the railway companies regarding concessions in the matter of freight on exhibits.

7. An official handbook of exhibits will be published at the time of the exhibition. Some pages in it will be devoted to advertisements and the rates for them will be published in the rules.

The tenderer shall examine closely the Madras Detailed Standard Specifications, and also the Standard Preliminary Specification contained therein, and sign the divisional office copy of the Madras Detailed Standard Specifications and its addenda volume in token of such study before submitting his tender that rates which shall be for finished work in situ. He shall also carefully study the drawings and additional specifications and all the documents which form part of the agreement to be entered into by the accepted tenderer. The Madras Detailed Standard Specifications and other documents connected with the contract such as specifications, plans, descriptive specification sheet regarding materials, etc., can be seen at any time between 11 a.m. and 5 p.m. on office days in the office of the Executive Engineer, Godavari Eastern Division.

A copy of the set of contract documents can also be had on payment of Rs. 2 for each set of 3

6. The tenderer's attention is directed to the requirements for materials under the clause "Materials and workmanship" in the "Preliminary Specification." Materials conforming to the British Standard Specifications shall be used on the work, and the tenderer shall quote his rates accordingly.

7. Every tenderer is expected, before quoting his rates, to inspect the site of the proposed work. He should also inspect the quarries, and satisfy himself about the quality and availability of materials. The names of quarries, kilns, etc., wherefrom certain materials are to be obtained will be given in the Descriptive Specification Sheet. The best class of materials to be obtained from the quarries or other source defined shall be used on the work. In every case the materials must comply with the relevant standard specification. Samples of materials as called for in the standard specifications, or in this tender notice, or as required by the Executive Engineer in any case, shall be submitted for the Executive Engineer's approval before the supply to site of work is begun. If the contractor, after examination of the source of materials defined in the Descriptive Specification Sheet, is of opinion that materials complying with the standard or other specifications of the contract cannot be obtained in quality or sufficient quantity from the source defined in the Descriptive Specification Sheet, he shall so state clearly in his tender and state wherefrom he intends to obtain materials, subject to the approval of the Executive Engineer.

The Government will not, however, after acceptance of a contract rate pay any extra charges for lead or for any other reason, in case the contractor is found later on to have misjudged the materials available. Attention of the contractor is directed to the standard "Preliminary Specification" regarding payment of seigniorage, tolls, etc.

8. The tenderer's particular attention is drawn to the sections and clauses in the standard "Preliminary Specification" dealing with—

(1) Test, inspection and rejection of defective materials and work.
(2) Carriage.
(3) Construction plant.
(4) Water and lighting.
(5) Cleaning up during progress and for delivery.
(6) Accidents.
(7) Delays.
(8) Particulars of payment.

The contractor should closely peruse all the specification clauses which govern the rates which he is tendering.

9. A schedule of quantities accompanies this tender notice. It shall be distinctly understood that the Government does not accept any responsibility for the correctness or completeness of this schedule, and that this schedule is liable to alterations by omissions, deductions, or additions at the discretion of the Executive Engineer, Godavari Eastern Division, or as set forth in the conditions of contract. The tenderer will, however, base his lump-sum tender on this schedule of quantities. He should quote specific rates for each item in the schedule, and the rates should be in rupees, annas, and units of three pies. The rates should be written both in words and figures and the units in words. The tenderer should also show the totals of each item and the grand total of the whole contract, and quote in the tender a lump sum for which he will undertake to do the whole work subject to the conditions of contract. This schedule accompanying the lump-sum tender shall be written legibly and free from erasures, overwritings or conversions of figures. Corrections where unavoidable, should be made by crossing out, initialling, dating and rewriting.

10. Tenders offering a percentage deduction from or increase on the estimate amount, and those not submitted in proper form or in due time will be rejected. Rates or lump-sum amounts for items not called for shall not be included in the tender. No alteration which is made by the tenderer in the contract form, the conditions of contract, the drawings, specifications, or quantities accompanying same will be recognized, and, if any such alterations are made, the tender will be void.

11. The tenderer should work out his own rates, without reference being made to the Public Works Department current schedule of rates or to the Public Works Department estimate rates which are not open for inspection by tenderers.

12. The price at which and the source from which certain particular materials shall be obtained by the contractor are given at the end of the schedule accompanying the tender form. Tenderers must accept the material at these prices, and shall quote their price for finished work accordingly. Notwithstanding any subsequent change in the market value for these materials, the charge to the contractor will remain as originally entered in the written contract. No cartage or incidental charges will be borne by Government in connexion with this supply.

13. The attention of the tenderers is directed to the contract requirements as to the time of beginning work, the rate of progress, and the dates for the completion of the whole work and its several parts. The following rate of progress and proportionate value of work done from time to time, as will be indicated by the Executive Engineer's certificates of the value of work done, will be required. Date of commencement of this programme will be the date on which the site (or premises) is handed over to the contractor:—

Period after date of commencement.	Percentage of work completed (based on contract lump-sum amount).
Three months ..	30 per cent.
Six months	60 "
Nine months	100 "

14. No part of the contract shall be sublet without written permission of the Executive Engineer nor shall transfer be made by power-of-attorney authorizing others to receive payment on the contractor's behalf.

15. If further necessary information is required, the Executive Engineer of the division will furnish such, but it must be clearly understood that tenders must be received in order, and according to instructions.

16. The Executive Engineer or other sanctioning authority reserves the right to reject any tender or all the tenders without assigning any reason therefor.

17. The qualifications of the supervising staff employed by the contractor in the execution of the work will be given due consideration in awarding the contract. The tenderers should therefore state in clear terms whether they employ such technical staff and, if so, to give the qualifications of such staff and the extent to which they will be employed on the work.

Executive Engineer, Godavari Eastern Division.

Dowlaishwaram, 10th August 1936.

TENDER FOR FORMING A ROADWAY OVER THE APPROACHES TO THE CAMPBELL AQUEDUCT AT PULIGADDA.

TENDERS will be received by the Executive Engineer, Kistna Special Division, at his office at Bezwada, up to 4 p.m., on 14th September 1936 for the work of forming a roadway over the approaches to the Campbell Aqueduct at Puligadda.

The tender should be in the prescribed form obtainable from the Executive Engineer's office.

2. Tenders must be submitted in sealed covers, and should be addressed to the Executive Engineer, Kistna Special Division, the name of the tenderer and the name of the work being noted on the cover. The tenders will be opened by the Executive Engineer on 14th September 1936 at 4-30 p.m.

If the tender is made by an individual, it shall be signed with his full name and his address shall be given. If it is made by a firm, it shall be signed with the co-partnership name by a member of the firm, who shall also sign his own name, and the name and address of each member of the firm shall be given. If the tender is made by a corporation, it shall be signed by a duly authorized officer who shall produce with his tender satisfactory evidence of his authorization. Such tendering corporation may be required, before the contract is executed, to furnish evidence of its corporate existence.

3. Each tenderer must pay, as earnest money, a sum of Rs. 300 (rupees three hundred only) into the branch of the Imperial Bank of India or into the Government treasury or sub-treasury within the jurisdiction of the Executive Engineer concerned to the credit of Revenue deposits on behalf of the Executive Engineer of the Kistna Special Division and enclose with his tender the chalan tendered accordingly. This earnest money will be refunded on the unsuccessful tenderer on application, after intimation is sent of rejection of the tender or at the expiration of two months from date of tender, whichever is earlier. This refund will be authorized by the Executive Engineer by suitable endorsement on the chalan. The earnest money will not be received in cash or currency notes by the Public Works Department officers, save in exceptional cases, where there are no treasuries of banks within the jurisdiction of the officer calling for tenders. When currency notes are given, the tenderer should sign his name in full with date, on the back of all the currency notes given by him, whatever their denominations may be.

The earnest money will be retained in the case of the successful tenderer and will not carry any interest. It will be dealt with as provided in the tender.

4. When a tender is to be accepted, the tenderer whose tender is under consideration shall attend the Division office on the date fixed by written intimation to him. He shall forthwith upon intimation being given to him by the Executive Engineer of acceptance of his tender make a security deposit of Rs. 300 (rupees three hundred only) in one of the forms prescribed in the Madras Public Works Account Code and sign an agreement in the proper departmental form for the due fulfilment of the contract. The security deposit together with the earnest money and the amount withheld according to clause 68 of the standard preliminary specification of the Madras Detailed Standard Specifications will be retained as security for the due fulfilment of this contract. If a cash security deposit is made by the contractor he shall follow the procedure laid down in the preceding paragraph for payment of earnest money and such deposit will not bear interest. Failure to attend the Division office on the date fixed in the written intimation from such office, or to enter into the required agreement or to make the security deposit as defined in the paragraph shall entail forfeiture of the earnest money.

5. The tenderer shall examine closely, the Madras Detailed Standard Specifications, and also the Standard Preliminary Specification contained therein, and sign the Divisional office copy of the Madras Detailed Standard Specifications and its addenda volume in token of such study before submitting his tender unit rates which shall be for finished work in situ. He shall also carefully study the drawings and additional specifications and all the documents which form part of the agreement to be entered into by the accepted tenderer. The Madras Detailed Standard Specifications and other documents connected with the contract such as specifications, plans, descriptive specification sheet regarding materials, etc., can be seen at any time between 11 a.m. and 5 p.m. on office days, in the office of the Executive Engineer, Kistna Special Division.

6. The tenderer's attention is directed to the requirements for materials under the clause "Materials and workmanship" in the "Preliminary Specification." Materials conforming to the British Standard Specifications shall be used on the work, and the tenderer shall quote his rates accordingly.

7. Every tenderer is expected, before quoting his rates, to inspect the site of the proposed work. He should also inspect the quarries, and satisfy himself about the quality and availability of materials. The names of quarries, kilns, etc., where from certain materials are to be obtained will be given in the Descriptive Specification Sheet. The best class of materials to be obtained from the quarries or other source defined shall be used on the work. In every case the materials must comply with the relevant standard specification. Samples of materials as called for in the standard specifications, or as the tender notes, or as required by the Executive Engineer in any case, shall be submitted for the Executive Engineer's approval before the supply to site of work is begun. If the contractor, after examination of the source of materials defined in the Descriptive Specification Sheet, is of opinion that materials complying with the standard or other specifications of the contract cannot be obtained in quality or sufficient quantity from the source defined in the Descriptive Specifications Sheet, he shall so state clearly in his tender and state wherefrom he intends to obtain materials, subject to the approval of the Executive Engineer.

The Government will not, however, after acceptance of a contract rate pay any extra charges for lead or for any other reason, in case the contractor is found later on

to have misjudged the materials available. Attention of the contractor is directed to the standard "Preliminary Specification" regarding payment of seigniorage, tolls, etc. Seigniorage for sand from the Government limits in the river is exempted.

3. The tenderer's particular attention is drawn to the sections and clauses in the standard "Preliminary Specification" dealing with—

(1) Test, inspection and rejection of defective materials and work.
(2) Cartage.
(3) Construction plant.
(4) Water and lighting.
(5) Cleaning up during progress and for delivery.
(6) Accidents
(7) Delays.
(8) Particulars of payment.
(9) Responsibility and liability of the contractor.

The contractor should closely peruse all the specification clauses which govern the rates which he is tendering.

4. A schedule of quantities accompanies this tender notice. It shall be definitely understood that the Government does not accept any responsibility for the correctness or completeness of this schedule, and that this schedule is liable to alterations by omissions, deductions, or additions at the discretion of the Executive Engineer, Kistna Special Division, or as set forth in the conditions of contract. The tenderer will, however, base his lump-sum tender on this schedule of quantities. He should quote specific rates for each item in the schedule, and the rates should be in rupees, annas, and in sums of three pies. The rates should be written both in words and figures and the units in words. The tenderer should also show the totals of each item and the grand total of the whole contract and quote in the tender a lump sum for which he will undertake to do the whole work subject to the conditions of contract such lump sum agreeing with the total amount of Schedule 'A.' This schedule accompanying the lump sum tender shall be written legibly and free from erasures, overwritings or conversions of figures. Corrections, where unavoidable, should be made by crossing out, initialing, dating and rewriting.

10. Tenders offering a percentage deduction from or increase on the estimate amount, and those not submitted in proper form or in due time will be rejected. Rates or lump-sum amounts for items not called for shall not be included in the tender. No alteration which is made by the tenderer in the contract form, the conditions of contract, the drawings, specifications, or quantities accompanying same will be recognized, and, if any such alterations are made, the tender will be void.

11. The tenderer should work out his own rates, without reference being made to the Public Works Department current schedule of rates or to the Public Works Department estimate rates which are not open for inspection by tenderers.

12. The attention of the tenderers is directed to the contract requirements as to the time of beginning work, the rate of progress, and the dates for the completion of the whole work and its several parts. The following rate of progress and proportionate value of work done from time to time, as will be indicated by the Executive Engineer's certificates of the value of work done, will be required. Date of commencement of the programme will be the date on which the site (or premises) is handed over to the contractor.

Percentage of work completed (based on contract lump-sum amount).	
All materials required for the work should be conveyed to the site before 31st October 1936 and the whole work should be finished by 15th January 1937.	

13. No part of the contract shall be sublet without written permission of the Executive Engineer nor shall transfer be made by power-of-attorney authorizing others to receive payment on the contractor's behalf.

14. If further necessary information is required, the Executive Engineer of the dividing will furnish such, but it must be clearly understood that tenders must be received in order, and according to instructions.

15. The Executive Engineer or other sanctioning authority reserves the right to reject any tender or all the tenders without assigning any reason therefor.

16. Separate payment will not be made for watering, protective works and consolidation. The cost of all works necessary during execution must be included in the unit rates
